The most common symptoms of COPD are sputum production, shortness of breath, and a productive cough. These symptoms are present for a prolonged period of time and typically worsen over time. It is unclear whether different types of COPD exist. While previously divided into emphysema and chronic bronchitis, emphysema is only a description of lung changes rather than a disease itself, and ...

Medical uses. Tiotropium is used for maintenance treatment of chronic obstructive pulmonary disease (COPD) which includes chronic bronchitis and emphysema. It is not however used for acute exacerbations.. Adverse effects. Adverse effects are mainly related to its antimuscarinic effects. Common adverse drug reactions ( $\geq 1\%$  of patients) associated with tiotropium therapy include: dry mouth and ...
